

# EXPRESS ENGINEERING SOLUTIONS

No one can de-code the code like us...!!

## HEAT EXCHANGER AND PVELITE SOFTWARE TRAINING

Code Understanding was never so easy...!!

# Index

Description	Basic (42 HRS)	Adv (52) HRS
Introduction	6	6
TEMA	6	10
ASME UHX	8	8
PDS/HTRI reports	2	2
Bolt Torque	0	2
PvElite & WRC	10	20
Q & A	10	10

**Prerequisites:** Candidate Should be Well Conversant with ASME Section VIII Div. 1 Code or Should Have Completed Basic / Advance ASME BPVC Training Course.

Lecture no 1 : Introduction to	Hrs	Basic (42 HRS)	Adv (52) HRS
<ul style="list-style-type: none"> <li>■ Heat Exchanger Types</li> <li>■ Significance of each type of heat exchanger</li> </ul>	6		
Lecture no 2 : TEMA	Hrs	Basic (42 HRS)	Adv (52) HRS
<ul style="list-style-type: none"> <li>■ Nomenclature</li> <li>■ Bundle pulling loads ( Horizontal Units)</li> <li>■ Bolt Tightening Sequence</li> <li>■ Scope-TEMA</li> <li>■ Definitions of <ul style="list-style-type: none"> <li>• Design Pressure</li> <li>• Standard Test</li> <li>• Pneumatic test</li> <li>• Metal temperatures</li> <li>• Corrosion allowances</li> </ul> </li> <li>■ Tube Pattern</li> <li>■ Tube Pitch</li> <li>■ Minimum shell and cover thickness</li> <li>■ Baffle Types and cuts</li> </ul>	6		

<ul style="list-style-type: none"> <li>■ Baffle clearances</li> <li>■ Baffle Thicknesses</li> <li>■ Longitudinal baffles thickness calculations</li> <li>■ Maximum Unsupported Tube spans/ For U-bends</li> <li>■ Impingement plate requirement and entrance areas</li> <li>■ Tie Rod size and Numbers</li> <li>■ Gaskets</li> <li>■ Tube sheet Thicknesses</li> <li>■ Tube Hole Diameters and clearances</li> <li>■ Tube Hole grooving</li> <li>■ Tube -Tube sheet Joints</li> <li>■ Minimum thickness of Channel covers</li> <li>■ Minimum Inside Depth</li> <li>■ Pass partition plate thickness</li> <li>■ Bolt Spacing</li> </ul>	—	—	—
<ul style="list-style-type: none"> <li>■ Entrance and exit areas</li> <li>■ Bypass Sealing arrangement</li> <li>■ Flow induced vibration</li> <li>■ Design considerations for vibration</li> </ul>	4	✗	✔

Lecture no 3 : ASME UHX	Hrs	Basic (42 HRS)	Adv (52) HRS
<ul style="list-style-type: none"> <li>■ Scope</li> <li>■ Terminology</li> <li>■ Condition of applicability</li> <li>■ Rules for the design of Fixed tubesheets</li> <li>■ Concept of shell bands</li> </ul>	8		
Lecture no 4: PDS/HTRI reports	Hrs	Basic (42 HRS)	Adv (52) HRS
<ul style="list-style-type: none"> <li>■ Understanding of PDS/HTRI report</li> <li>■ Important parameteres from Mechanical design Point of view</li> </ul>	2		
Lecture no 5: Bolt Torque	Hrs	Basic (42 HRS)	Adv (52) HRS
<ul style="list-style-type: none"> <li>■ Bolt Tightening torque calculations</li> </ul>	2		
Lecture no 6: PvElite & WRC	Hrs	Basic (42 HRS)	Adv (52) HRS
<ul style="list-style-type: none"> <li>■ Introduction to PvElite</li> <li>■ Modeling and design of BEM type ( Fixed Tubesheet Design)</li> <li>■ Modeling and Design of U tube heat exchanger ( BEU)</li> <li>■ Modeling of Expansion joint as per Mandatory Appendix 26 Of ASME</li> </ul>	10		

Lecture no 6: PvElite & WRC	Hrs	Basic (42 HRS)	Adv (52) HRS
<ul style="list-style-type: none"> <li>■ Modeling and Design of Floating head heat exchanger (AES)</li> <li>■ Concept OF WRC and Attachment Parameters</li> <li>■ Design Procedure for Stacked Heat Exchanger</li> <li>■ De-rating of flanges as per UG-44</li> </ul>	10	✗	✔
Lecture no 7: Q & A	Hrs	Basic (42 HRS)	Adv (52) HRS
<ul style="list-style-type: none"> <li>■ Live Online Question and answer sessions after every topic</li> </ul>	10	✔	✔
